

Python Programming — Coding Hub

Coding with Suninda

Syntax, variables, conditions, loops, lists, tuples, dictionaries, functions, modules, exceptions, OOP, iterators, generators, decorators and async roadmap.

Learning path

- Basic concepts and syntax
- Control flow and problem solving
- Functions and modular programming
- Object-oriented / structured concepts
- Error handling and debugging
- Intermediate data structures and APIs
- Advanced concepts and best practices
- Projects and interview practice
