

# C++ Programming — Coding Hub

## Coding with Suninda

Syntax, functions, references, classes, constructors, inheritance, polymorphism, templates, STL containers/algorithms, exceptions and modern C++ concepts.

## Learning path

- Basic concepts and syntax
- Control flow and problem solving
- Functions and modular programming
- Object-oriented / structured concepts
- Error handling and debugging
- Intermediate data structures and APIs
- Advanced concepts and best practices
- Projects and interview practice
